

Enhancing Treatment with VR

PROUD PARTNER!

Dr. Phil's Path to Recovery

Dr. Phil's Path to Recovery is a powerful new tool in the fight against addiction. Our facility is proud to offer this unique cutting-edge program for our clients. It is a virtual reality (VR) program that gives patients the opportunity to have a virtual session with Dr. Phil and leverages the power of the medium to create a powerful and personal healing experience.

The program includes:

- **VR headset** pre-programmed with 30 virtual "sit-downs" with Dr. Phil during which patients learn the keys to identifying and achieving the kind of life they really want. Patients leave these sessions feeling as though they've just had an eye-opening and insightful conversation about their life with Dr. Phil.
- **Workbooks** to accompany the VR exercises and hone in on specific aspects of the patient's life and way of thinking.

The Founders

Dr. Phil McGraw and Jay McGraw created *Dr. Phil's Path to Recovery* with both in-patient and out-patient drug and alcohol rehabilitation facilities in mind. With more than 45 years experience working in the mental health profession and addiction recovery, Dr. Phil understands what it takes for someone to make a drastic change in the direction of their lives. That's why he decided to bring his own brand of wake-up calls directly to patients via this cutting-edge virtual reality technology.
